

# Getting insights from your data

A QUICK START GUIDE

1. Open an existing data visualization (data layer or data view), or Combine data layers (data from different sources) into a data view

2. Use your mouse or trackpad to scroll and pan the map to identify the geographical area that you're interested in

3. Scroll and pan the time chart at the bottom of the screen to select a time range

4. Review the property breakdowns to the left of the map

5. Refine your results by filtering property values or adding geofences

6. Change the type of visualization for a different view of your data

7. Refine your multi-dimensional filter as you explore your data

The GeoSpock Spatial Big Data Platform, sometimes referred to as the Platform, is a cloud-based solution that processes big data and makes it available for analysis, enabling you to find patterns and trends in your data.
