

Preparing your data for ingest

A QUICK START GUIDE

1. Locate the S3 bucket for your source input data

2. Split your source files by time, locale or data source to optimise data ingestion

3. Add a schema for the data files

4. Make sure your data uses a supported:

- data format (.tsv, .csv and .jsonl)
- chosen file compression

5. Now you can create a layer template to ingest your data

The GeoSpock Spatial Big Data Platform, sometimes referred to as the Platform, is a cloud-based solution that processes big data and makes it available for analysis, enabling you to find patterns and trends in your data.

If you have any problems, contact support@geospock.com
